

Manufactured by
VeriVide Ltd

The DigiEye System

a complete non-contact color
measurement and imaging
solution.

- Uses a unique controlled lighting environment developed by VeriVide
- Reliable, consistent colour measurement and high definition imaging
- LED Illumination elements allowing for assessment of optically brightened and fluorescent samples
- Used within many diverse applications; colour matching, accurate colour measurement, inspection, audits & QC.

What Does DigiEye Deliver?

Bank Note Assessment

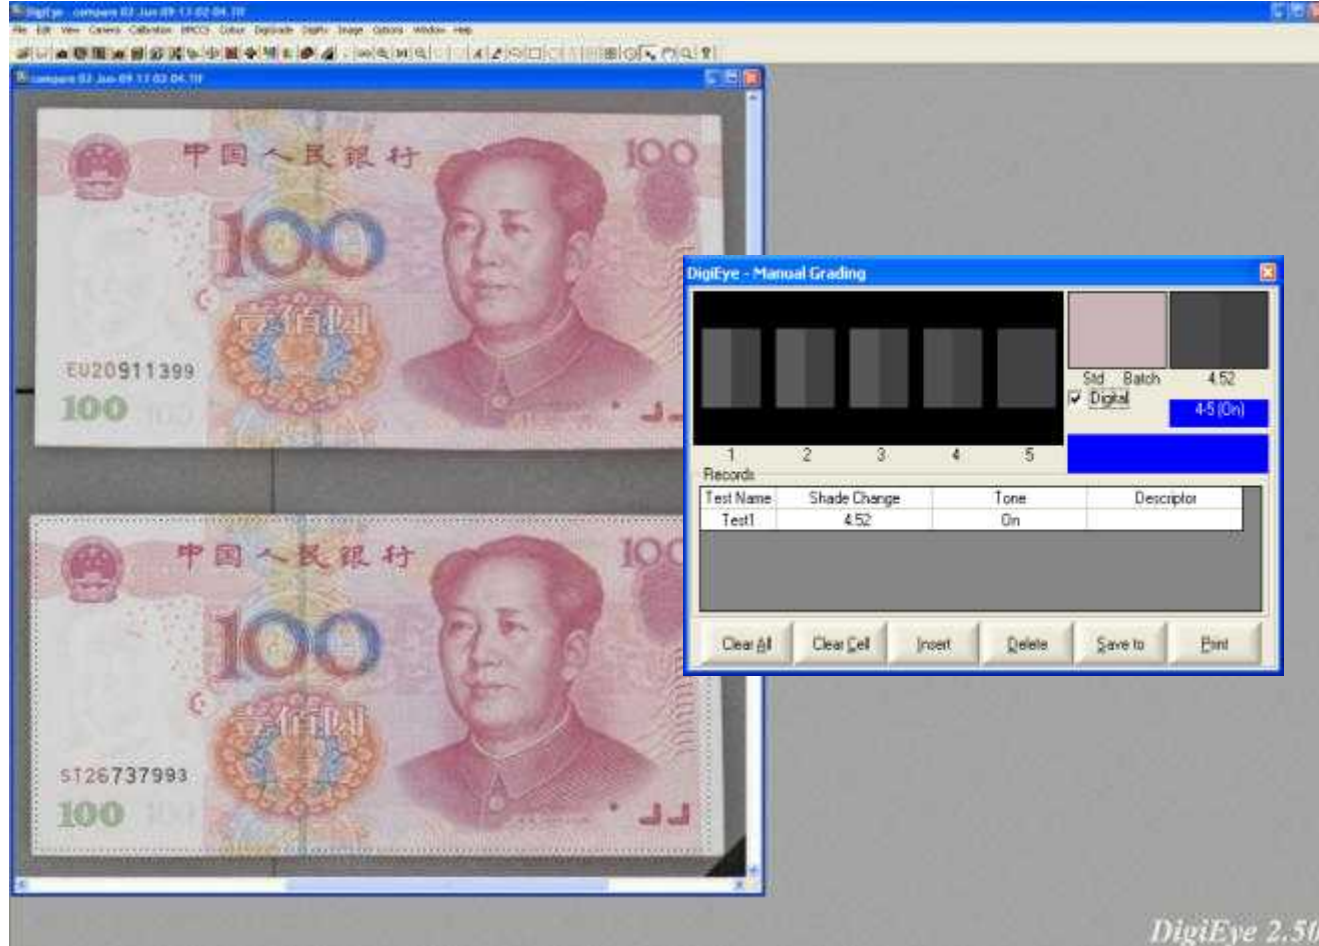

- Product appearance is important - we need to see it.
- Spectrophotometers don't do appearance – Cameras Do.
- Calibrated images - appearance communication possible.
- Visualisation of UV Security elements.
- DigiEye – Capture it – See it - AND look at the numbers.

UV Security Features

- UV LEDs allow for the assessment and visualisation of the UV security features

Colour Comparison

- Compare the overall visual and numerical colour of whole notes
- Perfect match equals value of 5
- As difference increases value decreases
- If the tone differs then this is reported with a verbal description
